

Customer:.....

Date:...../...../.....

Order number:.....

Quantity required:.....

STEP 1: INTERNAL CARCASE SIZE

Internal Height =.....mm

Internal Width =.....mm
(maximum width 1800mm)

STEP 2: DOOR TYPE

Aluminium Frame Door

Solid / Timber Door

STEP 3: TOTAL DOOR WEIGHT

To ensure the correct gas lift is supplied with Vela mechanism, please indicate the total door weight (including handle).

Approximate Weights: (these figures are a guide only, please check with your individual supplier)

16mm MDF = 12.6 kg/m²

16mm HRM Particle Board = 11.06 kg/m²

18mm MDF = 14.2 kg/m²

18mm HRM Particle Board = 12.4 kg/m²

0.8mm Laminate = 1 kg/m²

Brittany / Calais Door Frame = approx 14 kg/m²
(with 4mm glass)

TOTAL DOOR WEIGHT
(inc handle)

= KG

STEP 4: SELECT A MODEL

- No maximum internal height applies. We recommend purchasing up a model when the next minimum size is reached.
- Opening measurement remains constant for each model. The door extends below the hinge as the cupboard grows.

Model 36

Min Internal 320mm

Height above 277mm less board thickness

MAX 17kg

Model 72

Min Internal 390mm

Height above 278mm less board thickness

MAX 12kg

Model 39

Min Internal 349mm

Height above 340mm less board thickness

MAX 15kg

Model 54

Min Internal 390mm

Height above 298mm less board thickness

MAX 16kg

Model 44

Min Internal 390mm

Height above 435mm less board thickness

MAX 12.5kg

STEP 5: CONFIRMATION APPROVED
